

REMARKS

Applicants respond to the 7/01/02 Office Action by electing the Group I species of a monospecific F(ab')₂ as in claims 25 and 27-29. Accordingly, claim 25 is amended to recite the elected invention - hence the cancellation of claim 27 as moot. Claim 26 to the non-elected species is canceled herein responsive to the restriction requirement. Further prosecution on the merits is awaited.

Respectfully submitted,

GENENTECH, INC.

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Please amend claim 25 as follows:

25. (Amended) A composition comprising monospecific $F(ab')_2$ which is:
- (a) entirely free of $F(ab')_2$ having hinge region intrachain disulfide bonds;
 - (b) entirely free of contaminating arsenite; and
 - (c) entirely homogenous as to the heavy chain C-terminal amino acid residue.

Please cancel claims 26-27 without prejudice or disclaimer.
